

MEET THE TEAM

PRIYESH

The Aqua Army idea first started with our love for animals, arts and creativity. We wanted to create a project that not only was fun and illustrated but had meaning and purpose. We know we cannot change people's habits of dumping garbage into the ocean, but we can certainly use everything in our power to help clean it up and protect the beautiful animals we have living within our oceans. With the rise and popularity of NFT's this gave us the perfect opportunity to put our creative and professional minds together to ultimately build a community of like-minded people, whilst enjoying the in-depth artwork of our character collectibles.

OUR VALUES

CREDIBILITY

We are very aware that the NFT space is still very much in its infancy stages, and with that will bring opportunists and fraudulent groups of people who will try to deceive people.

The Aqua Army NFT collection is brought to you by the team at P8FX Trading. We do not hide behind avatars, we do not hide our names. We have always been transparent within our Trading and Investing business and will continue to do so professionally with Aqua Army.

INTEGRITY

We at P8FX Trading strive to provide the best all round quality in our products, with honest and transparent documented journeys.

We as individuals have strong morals and principles and we bring this to the table in everything we set out to do.

With Aqua Army we stay true to the traits and characters with each character bio being carefully researched to coincide with the real life animal itself.

CREATIVITY

With Aqua Army this is where we could really stretch our legs and bring that creative/outrageous side out.

From the get-go we wanted our characters to be hand drawn so we took our time to find and bring Fateh, the perfect illustrator to the team.

Stacey & Irene ran wild with the background story and brought to life the vision. We have much more creative features to be brought to life with this project.

PROJECT

The story starts in the Eternal Waters with the Tired Turtles and Waffling Walruses:

Their waters have started to destruct due to the Great Garbage Patch (GGP) which rapidly begins to appear and impacts the daily lives of the creatures in the Eternal Waters (straws, plastic bags, fishing nets, plastic bottles, fishing lines). They start to panic and search for a safer environment in other waters.

They look for help in the Perky Waters first, realising soon enough that the GGP has impacted these waters too. They come to the conclusion that the only solution to beat the plastic pollution is to push the GGP towards the shore for the evil humans to deal with.

PROJECT

The Tired Turtles and Waffling Walruses from the Eternal Waters join forces with the Jazzy Jellyfish and Sober Seahorses from the Perky Waters and they make a plan! But they need more physical strength and power. Lacking sea-creature-power they head towards the Clear Waters, to ask for help as they are inhabited by bigger and stronger mammals; Wacky Whales and Daring Dolphins.

Disaster strikes!! The Clear Waters are no longer clear, they are experiencing a toxic catastrophe from the nearby Oil Rig which has affected the strength of all the creatures living there.

All the creatures realise that their only hope, no matter how dangerous it sounds, is lying in the Deadly Waters - the ONLY waters not yet impacted by ANY human pollution.

PROJECT

Not only are the creatures in the Deadly Waters their enemies, but they also have no idea of the potential disaster to the Aqua World and that ALL sea creatures are at risk. To survive they need to enter the perilous Deadly Waters to seek help and form an Aqua Army, uniting with the Silky Sharks and the Snappy Swordfish. The adventure begins!

The Aqua Army is formed. Their aim is to protect the Aqua World and push the Great Garbage Patch to the shore for the evil/irresponsible humans to deal with!

Their journey begins...

CHARITIES & DONATION

Aqua Army NFT pledges to a percentage of all the proceeds from this project to 5 non-profit sea-based charities.

The NFT world is up-and-coming, exciting and will only gain in popularity in the future. We want to show this new, captivating audience that whilst owning one-of-a-kind pieces of digital art you are still able to give back, raise awareness and donate to brilliant charities at the same time.

The Aqua Army NFT team will travel to our selected charities to give the donations in person as we want to remain as transparent as possible. We truly believe that by contributing to these good causes we can inspire more people to take the destruction of our oceans seriously. As technology and the art world evolve, we want to make it clear to everyone that together we can all make a difference, and we can have a positive impact on the world we live in.
